

## Dwight's Story

On June 8th, 2006, Dwight had a heart transplant due to severe cardiomyopathy. In February of 2009, he was diagnosed with post-transplant arteriosclerosis, a condition in which the arteries in the heart begin to narrow and eventually close. The condition is medically irreversible, irreparable, and unstoppable. The only treatment for Dwight's condition is another transplant. He is currently listed on the transplant waiting list.

Funds raised through this event will help defray the expenses related to Dwight's medical care.
